

# ENCINA WASTEWATER AUTHORITY

---

A Public Agency

Last Updated: May 25, 2016

## Senate Bill (SB) 272

Approved on October 11, 2015, SB 272 adds a section to the California Public Records Act requiring local agencies to create a catalog of Enterprise Systems used by the agency by July 1, 2016, which must be updated annually.

## Enterprise System

1. An Enterprise System is a software application or computer system that collects, stores, exchanges and analyzes information that the agency uses that is both of the following:
  - a. A multi-departmental system or systems that contain information collected about the public.
  - b. A system that serves as an original source of data within an agency.
2. An Enterprise System does not include any of the following:
  - a. Information technology security systems, including firewalls and other cybersecurity systems.
  - b. Physical access control systems, employee identification management systems, video monitoring and other physical control systems.
  - c. Infrastructure and mechanical control systems, including those that control or manage street lights, electrical, natural gas, or water or sewer functions.
  - d. Systems related to 911 dispatch and operation or emergency services.
  - e. Systems that would be restricted from disclosure by Section 6254.19.
  - f. The specific records that the information technology system collects, stores, exchanges or analyzes.

## Requirements

- 1) To create a catalog of Enterprise Systems containing:
  - a. Current system vendor
  - b. Current system product
  - c. System's purpose
  - d. A description of categories or types of data
  - e. The department that is the prime custodian of the data
  - f. The frequency that system data is collected
  - g. The frequency that system data is updated
- 2) To make the catalog publicly available upon request
- 3) To post the catalog in a prominent location on the agency's website

## Exception

If the public interest served by not disclosing the information described clearly outweighs public interest served by disclosure, the local agency may instead provide a system name, brief title or identifier of the system.
