

ENCINA WASTEWATER AUTHORITY

DATE: March 2013 (revised)
POSITION TITLE: Source Control Manager
DEPARTMENT: Environmental Compliance
SECTION: Source Control
REPORTS TO: Director of Environmental Compliance
FLSA STATUS: Exempt

POSITION SUMMARY: Under general supervision of the Director of Environmental Compliance, customarily and regularly exercises discretion, independent judgment, and decision-making. This position: plans, organizes, and administers the permitting, monitoring, inspection, enforcement, pollution prevention, and data management activities of the Source Control Program in accordance with federal, state and local laws; investigates industry related wastewater, biosolids and reclaimed water quality problems, determines the cause of problems and recommends solutions and/or mitigation measures; prepares regulatory reports; serves as a Biosolids Environmental Management System (EMS) team member; provides technical and professional support to operations, laboratory, and member agency staff; and performs other related duties as assigned. This position is responsible for supervision and oversight of all source control related activities in the Authority.

SUPERVISORY DIMENSIONS: Supervises the staff and activities of the source control section.

ESSENTIAL JOB DUTIES: The duties listed below are intended only as illustrations of the various types of work that may be performed.

- Exhibits all leadership traits and ethical behaviors required of California local government executives.
- Committed to the achievement of EWA's Mission and Vision, and personally exemplifies EWA's Values.
- Plans, organizes, controls, integrates and evaluates the work of the source control section; with staff, develops, implements and monitors work plans to achieve goals and objectives; contributes to the development of and monitors performance against the annual source control budget; supervises and participates in developing, implementing and evaluating plans, work processes, systems and procedures to achieve annual goals, objectives and work standards; identifies section training needs.
- Establishes performance requirements; regularly monitors performance and provides coaching for performance improvement and development; prepares and reviews performance evaluations; makes recommendations for compensation to recognize performance; subject to management

concurrency, takes disciplinary action, up to and including termination, to address performance deficiencies, in accordance with the Authority's personnel rules and policies.

- Conducts inspections; categorizes industries; issues permits; monitors performance; initiates and conducts necessary enforcement activities including issuing Notices of Violation (NOVs), fines and compliance schedules, and holding enforcement hearings; and suggests strategies to improve compliance rates.
- Prepares regulatory reports.
- Prepares and presents oral reports as directed.
- Takes a lead role in industrial response activities including investigation of discharge impacts on treatment plant operations; identification of suspect industries; participation in trunk line surveys to quantify pollutants and develop technically based local limits.
- Keeps current with local, state and federal regulations and their impact on the Authority's Source Control Program; works with regulating agencies such as EPA, State Water Resources Control Board and Regional Water Quality Control Board to implement suggestions to improve program performance and ensure compliance.
- Provides technical support to the Authority by analyzing and interpreting data to ensure the timely and competent resolution of source control related problems.
- Manages pretreatment critical control points to ensure the Authority's Biosolids Environmental Management System meets or exceeds applicable standards for certification.

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. Reasonable accommodations will be made to enable qualified individuals with disabilities to perform the essential functions.

Specific Types Of Knowledge, Skills And Physical Abilities Required For These Duties:

- Knowledge of industrial pretreatment procedures, programs, and safety regulations; federal categorical pretreatment standards, pretreatment systems and manufacturing processes; effects of industrial wastewater on the sewerage system, on sewerage system personnel, and on treatment plant processes; regulatory permits and program requirements governing ocean discharges, water reclamation, storm water discharges, and on landfill and resource recovery operations; laboratory procedures used to identify and measure pollutants of concern; sampling procedures, chain of custody procedures, preservation techniques, and holding times for a variety of analytical methods.
- Ability to analyze technical data and reports, review documents for completeness and accuracy, and exercise sound judgment to determine compliance with existing laws and regulations; initiate and complete extensive and thorough industry related enforcement actions; perform conventional quality assurance, quality control (QA/QC) procedures that will ensure data integrity such that it remains defensible in a court of law; review compliance data to determine industrial user violation status; operate a personal computer for data processing, spreadsheet preparation and word processing; prepare and maintain clear and concise records, reports, correspondence and other

written materials; maintain effective working relationships with staff and others encountered in the course of work; and exercise independent judgment and initiative within general policy guidelines.

- Knowledge of the Authority's Biosolids Environmental Management System.

EDUCATION REQUIREMENT: A Bachelor's Degree in natural or environmental science, engineering, or a closely related field from an accredited college or university.

EXPERIENCE REQUIREMENT: Six (6) years of increasingly responsible experience in the Source Control field, including three (3) years at a supervisory or management level.

LICENSE REQUIREMENT: Possession of a valid California Class C Driver's License and ability to be insured under the agency's automobile insurance coverage.

Note: Failure to maintain a valid California Driver's License constitutes a possible cause for termination.

CERTIFICATION REQUIREMENT: Possession of a Grade IV California Water Environment Association (CWEA) Environmental Compliance Inspector certificate is desired, but not required.

PHYSICAL AND MENTAL DEMANDS:

Physical Demands

While performing the duties of this position, the employee is regularly required to walk; talk or hear by telephone and in person; sit; smell; use hands and fingers to handle, feel or operate objects, tools, or controls; reach with hands or arms. The employee is frequently required to stand for prolonged periods of time. Specific vision abilities required by this job include close vision, distance vision, the ability to distinguish colors and shades, depth perception, and the ability to adjust focus.
